

## 100% Mechanical Hand Sanitizing Station

**Foot Operated fully contained Hand Sanitizing Station:** This station was developed to dispense liquid hand sanitizers. The unit is made with marine and aircraft grade materials, to ensure it holds up to the harsh elements around the nation. The hands' free, dispenser is designed for use of liquid hygiene products. The foot pedal activation eliminates contamination due to hand contact. The unit can hold up to 4, one-gallon containers or a 5-gallon bucket for dispensing. The industrial design is perfect for dispensing hand sanitizer in food preparation areas, hospitals, military facilities, retail store entrances, and countless other locations.

### Key Features

- Proprietary stainless-steel pump construction - **Built to Last!**
- Completely foot operated - no hand contact points
- Draws liquids from any Gallon or 5 Gallon container
- Performance tested to over 70 thousand strokes
- Ideal for transition zones to prevent cross-contamination
- No electricity or batteries required
